Notes:

1. For Max. or Min. conditions, use appropriate value specified under Electrical Characteristics for the applicable device type.
2. Typical values are at V_{CC} = 3.3V, T_A = 25°C ambient and maximum loading.
3. Measured by the voltage drop between I and Y pin at indicated current through the switch. ON resistance is determined by the lower of the voltages on the two (I, Y) pins.
4. This parameter is determined by device characterization but is not production tested.

Power Supply Characteristics

Parameters	Description	Test Conditions ⁽¹⁾		Min.	Typ. ⁽²⁾	Max.	Units
I_{CC}	Quiescent Power Supply Current	$V_{CC} = \text{Max.}$	$V_{IN} = \text{GND or } V_{CC}$		0.1	3	μA

Notes:

1. For Max. or Min. conditions, use appropriate value specified under Electrical Characteristics for the applicable device.
2. Typical values are at $V_{CC} = 3.3\text{V}$, $+25^\circ\text{C}$ ambient.
3. Per TTL driven input (control input only); I and Y pins do not contribute to I_{CC} .

Switching Characteristics over Operating Range

Parameters	Description	Conditions ⁽¹⁾	PI3B3251		Units
			Com.		
			Min.	Max.	
t _{PD}	Propagation Delay ^(2,3) In to Y	C _L = 50pF R _L = 500Ω		0.25	ns
t _{SY}	Bus Enable Time S _n to Y	C _L = 50pF R _L = 500Ω	1	4.5	
t _{PZH} t _{PZL}	Bus Enable Time E̅ to Y	C _L = 50pF R _L = 500Ω	1	3.5	
t _{PHZ} t _{PLZ}	Bus Disable Time E̅ to Y	C _L = 50pF R _L = 500Ω	1	5.5	

Notes:

1. See test circuit and waveforms.
2. This parameter is guaranteed but not tested on Propagation Delays.
3. The bus switch contributes no propagational delay other than the RC delay of the ON resistance of the switch and the load capacitance. The time constant for the switch alone is of the order of 0.25ns for 50pF load. Since this time constant is much smaller than the rise/fall times of typical driving signals, it adds very little propagational delay to the system. Propagational delay of the bus switch when used in a system is determined by the driving circuit on the driving side of the switch and its interaction with the load on the driven side.
