

AN7158N

Dual 7.5W Audio Power Amplifier Circuit

Overview

The AN7158N is an integrated circuit designed for power amplifier of 7.5W (16V, 4Ω) output with low noise and low distortion, and it suits TV set with multi-sound. Stereo operation is enabled due to incorporating two amplifiers on one chip. 12-pin SIL package enabled compact and high-densely mounted set.

Features

- Incorporating protection circuits (surge, thermal protection and etc.)
- Automatic operating point stabilizer circuit
- Low distortion, low 1/f noise
- Low shock noise from power ON/OFF operation
- Better channel separation
- Fewer external components
