AN8060, AN8060S

Low Drop Type Negative Output (–4V) Regulator with Reset Pin

■ Overview

The AN8060 and the AN8060S are the low drop type regulators having the function of resetting output voltage. With a comparator to sence reduced voltage builting it is suitable for batteries operation.

■ Features

- With reset function : bias current at resetting –5µA
- Small input-output voltage difference : I_O=30mA, 0.2V
- Low Supply Voltage sensing comparator built-in
