

Agilent HLMP-EDxx/EGxx/ELxx 5 mm Precision Optical Performance Best Value AlInGaP Lamps Data Sheet

Description

These Precision Optical Performance AlInGaP and AlInGaP II LEDs provide superior light output for excellent readability in sunlight and are extremely reliable.

These LED lamps are untinted, nondiffused, T-1 3/4 packages incorporating second generation optics producing well defined spatial radiation patterns at specific viewing cone angles.

Notes:

1. $2\theta_{1/2}$ is the off-axis angle where the luminous intensity is 1/2 the on-axis intensity.
2. The luminous intensity is measured on the mechanical axis of the lamp package.
3. The optical axis is closely aligned with the package mechanical axis.
4. The dominant wavelength, λ_d , is derived from the CIE Chromaticity Diagram and represents the color of the lamp.

Notes:

1. For options -xxRxx and -xxTxx, maximum forward voltage, V_F is 2.6 V.
2. 2θ_{1/2} is the off-axis angle where the luminous intensity is 1/2 the on-axis intensity.
3. The radiant intensity, I_e in watts per steradian, may be found from the equation I_e = I_v/η_v where I_v is the luminous intensity in candelas and η_v is the luminous efficacy in lumens/watt.
