

3A, VERY LOW DROP VOLTAGE REGULATOR

- VERY LOW DROPOUT VOLTAGE (TYP. 0.4 AT 3A)
- GUARANTEED OUTPUT CURRENT UP TO 3A
- FIXED VOLTAGE WITH $\pm 1\%$ TOLLERANCE AT 25°C
- INTERNAL CURRENT AND THERMAL LIMIT

DESCRIPTION

The LD29300 is a high current, high accuracy, low-dropout voltage regulators series. These regulators feature 400mV dropout voltages and very low ground current. Designed for high current loads, these devices also find applications in lower current, extremely low dropout-critical systems, where their tiny dropout voltage and ground current values are important attributes. Typical

application are in Power supply switching post regulation, Series power supply for monitor, Series power supply for VCRs and TVs, Computer Systems and Battery powered systems.
