**High-Gain Single and Dual Operational Amplifiers  
for Military, Industrial and Commercial Applications**

August 1991

**3**  
OPERATIONAL  
AMPLIFIERS

**Features:**

- Input Bias Current (All Types) ..... 500nA (Max.)
- Input Offset Current (All Types) ..... 200nA (Max.)

**Applications**

- Comparator
- DC Amplifier
- Integrator or Differentiator
- Multivibrator
- Narrow-Band or Band-Pass Filter
- Summing Amplifier

**Description**

The CA1458, CA1558 (dual types); CA741C, CA741 (single-types); high-gain operational amplifiers for use in military, industrial, and commercial applications.

These monolithic silicon integrated-circuit devices provide output short-circuit protection and latch-free operation. These types also feature wide common-mode and differential-mode signal ranges and have low-offset voltage nulling capability when used with an appropriately valued potentiometer. A 10-kohm potentiometer is used for offset nulling types CA741C, CA741 (See Fig. 9); and types CA1458, CA1558, have no specific terminals for offset nulling. Each type consists of a differential-input amplifier that effectively drives a gain and level-shifting stage having a complementary emitter-follower output.

The manufacturing process make it possible to produce IC operational amplifiers with low-burst ("popcorn") noise characteristics. The CA741 gives limit specifications for burst noise in the data bulletin, File No. 530. Contact your Sales Representative for information pertinent to other operational amplifier types that meet low-burst noise specifications.

This operational amplifier line also offers the circuit designer the option of operation with internal or external phase compensation.

Unity gain with external phase compensation can be obtained with a single 30-pF capacitor. All the other types are internally phase-compensated.

TYPE NO.	NO. OF AMPL.	PHASE COMP.	OFFSET VOLTAGE NULL	MINIMUM AOL	MAXIMUM VIO (mV)	OPERATING TEMPERATURE RANGE (°C)
CA1458	Dual	Int.	No	20k	6	0 to 70 <sup>▲</sup>
CA1558	Dual	Int.	No	50k	6	-55 to 125
CA741C	Single	Int.	Yes	20k	6	0 to 70 <sup>▲</sup>
CA741	Single	Int.	Yes	50k	6	-55 to +125

<sup>▲</sup> All types in any package style can be operated over the temperature range of -55 to +125°C, although the published limits for certain electrical specifications apply only over the temperature range of 0 to +70°C.

\* Technical Data on LM Branded types is identical to the corresponding CA Branded types.  
CAUTION: These devices are sensitive to electrostatic discharge. Proper I.C. handling procedures should be followed.

**Ordering Information**

**T-79-05-10**

When ordering any of these types, it is important that the appropriate suffix letter for the package required be affixed to the type number. For example: If a CA1458 in a straight-lead TO-5 style package is desired, order CA1458T.

TYPE NO.	PACKAGE TYPE AND SUFFIX LETTER							FIG. NO
	TO-5 STYLE			PLASTIC		CHIP	BEAM LEAD	
	8L	10L	DIL-CAN	8L	14L			
CA1458	T	-	S	E	-	H	-	1b, 1d
CA1558	T	-	S	E	-	-	-	1b, 1d
CA741C	T	-	S	E	-	H	-	1a, 1c
CA741	T	-	S	E	-	-	L	1a, 1c

**Absolute Maximum Ratings  $T_A = +25^\circ\text{C}$**

DC Supply Voltage (Between V+ and V- Terminals):

CA741C, CA1458 (Note 2) ..... 36V  
 CA741, CA1558 (Note 2) ..... 44V

Differential Input Voltage .....  $\pm 30\text{V}$

DC Input Voltage (Note 1) .....  $\pm 15\text{V}$

Output Short-Circuit Duration ..... Indefinite

Device Dissipation:

Up to  $+70^\circ\text{C}$  (CA741C) ..... 500mW

Up to  $+75^\circ\text{C}$  (CA741) ..... 500mW

Up to  $+30^\circ\text{C}$  (CA1558) ..... 680mW

Up to  $+25^\circ\text{C}$  (CA1458) ..... 680mW

For Temperatures Exceeding Those Indicated Above ..... Derate Linearly  $8.67\text{mW}/^\circ\text{C}$

Voltage Between Offset Null and V- (CA741C, CA741) .....  $\pm 0.5\text{V}$

Ambient Operating Temperature Range:

CA741, CA1558 .....  $-55$  to  $+125^\circ\text{C}$

CA741C, CA1458 .....  $0$  to  $+70^\circ\text{C}$  (Note 3)

Ambient Storage Temperature Range .....  $-65$  to  $+150^\circ\text{C}$

Lead Temperature (During Soldering):

At Distance  $1/16 \pm 1/32$  Inch ( $1.59 \pm 0.79\text{mm}$ ) from Case for 10 Seconds Max .....  $+265^\circ\text{C}$

NOTES: 1. If Supply Voltage is Less than  $\pm 15$  Volts, the Absolute Maximum Input Voltage is Equal to the Supply Voltage.

2. Voltage Values Apply for Each of the Dual Operational Amplifiers.

3. All Types in any Package Style Can Be Operated Over the Temperature Range of  $-55$  to  $+125^\circ\text{C}$ , Although the Published Limits for Certain Electrical Specifications Apply Only Over the Temperature Range of  $0$  to  $+70^\circ\text{C}$
