

General Description

The AHK432 is a low voltage adjustable shunt reference with thermal stability guaranteed over the full industrial temperature range. This 3-terminal regulator has an output voltage range that extends from V_{REF} (1.24V) to 20V, giving designers outstanding flexibility in the development of power supplies and instrumentation. With a low operating current of 60 μ A, the AHK432 is well suited for battery-powered portable electronic applications. It also has a sharp turn-on characteristic and a dynamic resistance of only 50m Ω making it an excellent replacement for zener diodes in low tempco designs.

The AHK432 is available in the surface-mount 3 or 5 pin SOT-23, as well as the through hole TO-92. Three voltage tolerance options are offered in each package: $\pm 0.5\%$, $\pm 1\%$, and $\pm 2\%$.

Features

- Wide output voltage range (1.24 to 20V)
- Operating current from 60 μ A to 100mA
- Low dynamic output resistance of 50m Ω
- $\pm 0.5\%$ trimmed voltage reference
- 10mV typ. V_{REF} deviation, from -40 to +105°C
- Surface mount 3 or 5 pin SOT-23 or through-hole 3 pin TO-92 packages

Applications

- Notebook computers
- Isolated feedback in switching power supplies
- Adjustable and programmable supplies
- Linear regulators (External Reference)
- Instrumentation
- Medical Electronics*
- Global voltage reference for multiple power supplies

Typical Application

Adjustable regulator:

$$OUT = V_{REF} \left(\frac{R1 + R2}{R2} \right)$$

Absolute Maximum Ratings ($T_A=25^\circ\text{C}$ unless otherwise noted)

Symbol	Description	Value	Units
V_Z	Cathode Voltage	20	V
I_Z	Continuous Cathode Current	100	mA
I_{REF}	Reference Current	3	mA
T_J	Operating Junction Temperature Range	-40 to 150	$^\circ\text{C}$
Θ_{JA}	Maximum Thermal Resistance	TO-92	160
		SOT-23-3, SOT-23-5	410
P_D	Maximum Power Dissipation	TO-92	780
		SOT-23-3, SOT-23-5	300
T_{LEAD}	Maximum Soldering Temperature (at Leads)	260	$^\circ\text{C}$

Note: Stresses above those listed in Absolute Maximum Ratings may cause permanent damage to the device. Functional operation at conditions other than the operating conditions specified is not implied. Only one Absolute Maximum rating should be applied at any one time.

Electrical Characteristics ($T_J=25^\circ\text{C}$ unless otherwise noted)

Symbol	Description	Conditions	AHK432 0.5%			AHK432 1.0%			AHK432 2.0%			Units	
			min	typ	max	min	typ	Max	min	typ	max

*** LIFE SUPPORT POLICY**

AnalogicTech's PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF Advanced Analogic Technologies Inc. As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

AnalogicTech cannot assume responsibility for use of any circuitry other than circuitry entirely embodied in an AnalogicTech product. No circuit patent licenses, copyrights, mask work rights, or other intellectual property rights are implied.

AnalogicTech reserves the right to make changes to their products or specifications or to discontinue any product or service without notice, and advise customers to obtain the latest version of relevant information to verify, before placing orders, that information being relied on is current and complete. All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgement, including those pertaining to warranty, patent infringement, and limitation of liability.

AnalogicTech warrants performance of its semiconductor products to the specifications applicable at the time of sale in accordance with AnalogicTech's standard warranty. Testing and other quality control techniques are utilized to the extent AnalogicTech deems necessary to support this warranty. Specific testing of all parameters of each device is not necessarily performed.
