## Spatial, stereo and pseudo-stereo sound circuit

## TDA3810

### DESCRIPTION

The TDA3810 integrated circuit provides spatial, stereo and pseudo-stereo sound for radio and television equipment.

### Features

- Three switched functions:
  - spatial (widened stereo image)
  - stereo
  - pseudo-stereo (artificial stereo from a mono source)
- Offset compensated operational amplifiers to reduce switch noise
- LED driver outputs to facilitate indication of selected operating mode
- Start/stop circuit to reduce switch noise and to prevent LED-flicker
- TTL-compatible control inputs

### QUICK REFERENCE DATA

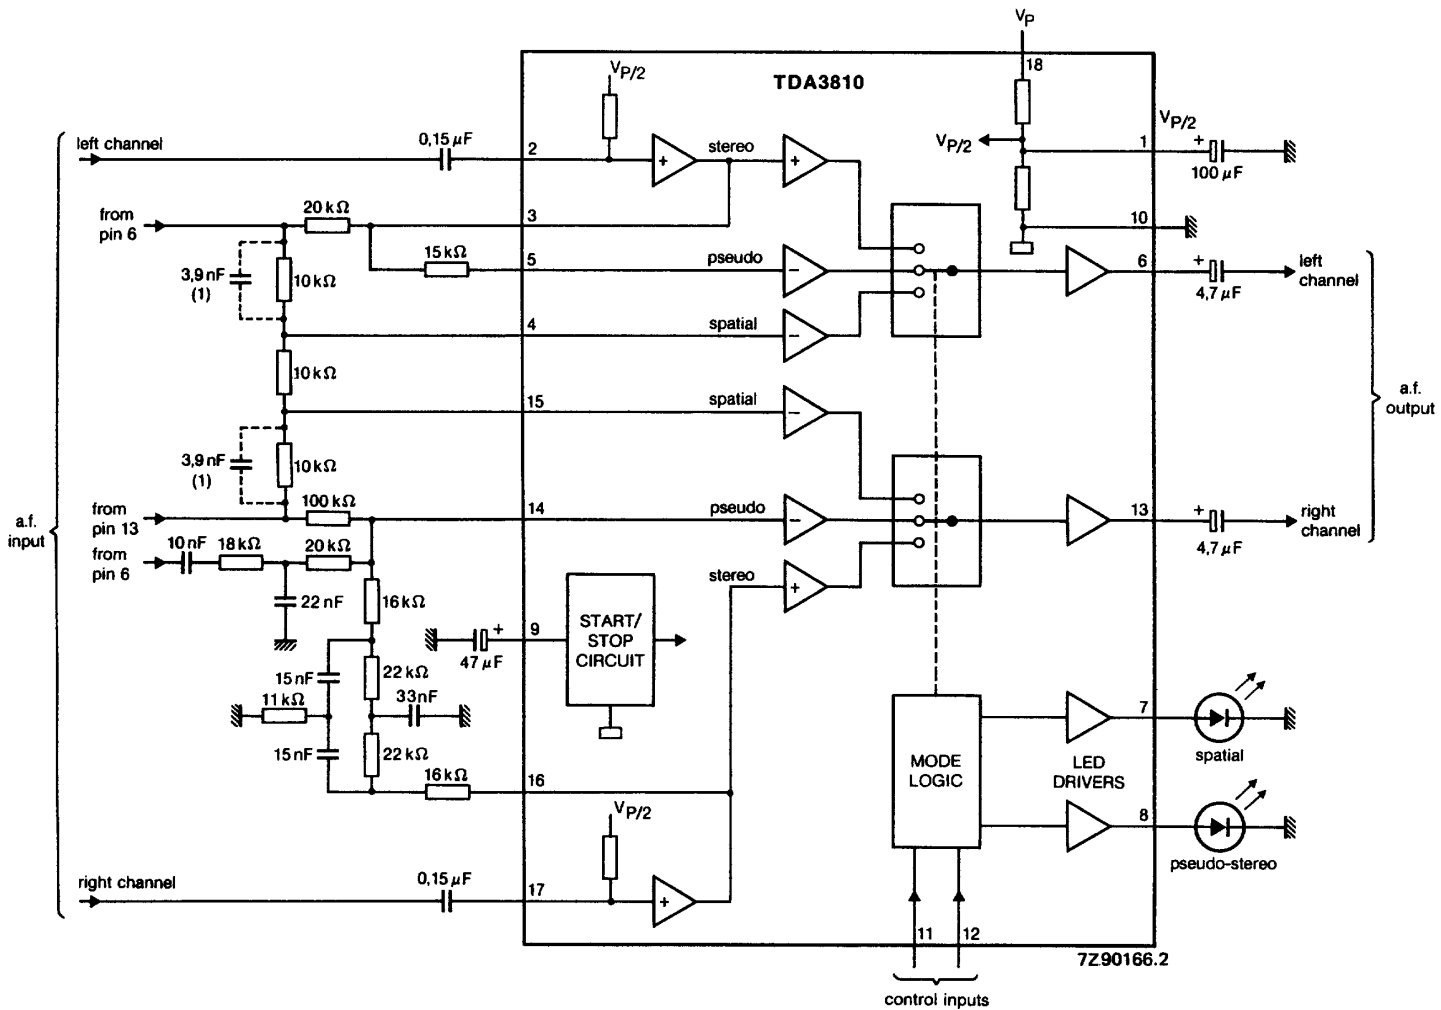

Supply voltage (pin 18)	$V_P$	typ.	12	V
Supply current (LEDs off)	$I_P$	typ.	6	mA
Operating ambient temperature range	$T_{amb}$		0 to +70	°C
Input signals (r.m.s. value)	$V_{i(rms)}$	<	2	V
Total harmonic distortion (stereo)	THD	typ.	0,1	%
Channel separation (stereo)	$\alpha$	typ.	70	dB
Gain (stereo)	$G_V$	typ.	0	dB

### PACKAGE OUTLINE

18-lead DIL; plastic (SOT102); SOT102-1; 1996 November 25.

# Spatial, stereo and pseudo-stereo sound circuit

## TDA3810

(1) Used in spatial mode for correction of high frequency only (optimal performance).

Fig.1 Block diagram/test circuit showing external components; for control inputs to pins 11 and 12 see truth table.

# Spatial, stereo and pseudo-stereo sound circuit

TDA3810

## RATINGS

Limiting values in accordance with the Absolute Maximum System (IEC 134)

Supply voltage (pin 18)	$V_P$	max.	18	V
Storage temperature range	$T_{stg}$		-25 to +150	°C
Operating ambient temperature range	$T_{amb}$		0 to +70	°C

## THERMAL RESISTANCE

From crystal to ambient	$R_{th\ cr-a}$	=	80	K/W
-------------------------	----------------	---	----	-----

## CHARACTERISTICS

 $V_P = 12\text{ V}$ ;  $T_{amb} = 25\text{ °C}$ ; test circuit Fig.1 stereo mode (pin 11 to ground) unless otherwise specified.

Output load:

 $R_{6-10, 13-10} \geq 4,7\text{ k}\Omega$ ;  $C_{6-10, 13-10} \leq 150\text{ pF}$ .

PARAMETER	SYMBOL	MIN.	TYP.	MAX.	UNIT
Supply voltage range (pin 18)	$V_P$	4,5	–	16,5	V
Supply current	$I_P$	–	6	12	mA
Reference voltage	$V_S$	5,3	6	6,7	V
Input voltage (pin 2 or 17) THD = 0,2% (stereo mode)	$V_{i(rms)}$	–	–	2	V
Input resistance (pin 2 or 17)	$R_i$	50	75	–	k $\Omega$
Voltage gain $V_o/V_i$	$G_v$	–	0	–	dB
Channel separation (R/L)	$\alpha$	60	70	–	dB
Total harmonic distortion $f = 40\text{ to }16\ 000\text{ Hz}$ ; $V_{o(rms)} = 1\text{ V}$	THD	–	0,1	–	%
Power supply ripple rejection	RR	–	50	–	dB
Noise output voltage (unweighted) left and right output	$V_{n(rms)}$	–	10	–	$\mu\text{V}$
<i>SPATIAL MODE</i> (pins 11 and 12 HIGH)					
Antiphase crosstalk	$\alpha$	–	50	–	%
Voltage gain	$G_v$	1,4	2,4	3,4	dB

## PSEUDO-STEREO MODE

The quality and strength of the pseudo-stereo effect is determined by external filter components.

# Spatial, stereo and pseudo-stereo sound circuit

TDA3810

PARAMETER	SYMBOL	MIN.	TYP.	MAX.	UNIT
<i>CONTROL INPUTS</i> (pins 11 and 12)					
Input resistance	$R_i$	70	120	–	$k\Omega$
Switching current	$-I_i$	–	35	100	$\mu A$
<i>LED DRIVERS</i> (pins 7 and 8)					
Output current for LED	$-I_o$	10	12	15	mA
Forward voltage	$V_F$	–	–	6	V

## Truth table

MODE	CONTROL INPUT STATE		LED SPATIAL PIN 7	LED PSEUDO PIN 8
	PIN 11	PIN 12		
Mono pseudo-stereo	HIGH	LOW	off	on
Spatial stereo	HIGH	HIGH	on	off
Stereo	LOW	X	off	off

LOW = 0 to 0,8 V (the less positive voltage)

HIGH = 2 V to 5,5 V (the more positive voltage)

X = don't care

### SOLDERING

#### Introduction

There is no soldering method that is ideal for all IC packages. Wave soldering is often preferred when through-hole and surface mounted components are mixed on one printed-circuit board. However, wave soldering is not always suitable for surface mounted ICs, or for printed-circuits with high population densities. In these situations reflow soldering is often used.

This text gives a very brief insight to a complex technology. A more in-depth account of soldering ICs can be found in our "IC Package Databook" (order code 9398 652 90011).

#### Soldering by dipping or by wave

The maximum permissible temperature of the solder is 260 °C; solder at this temperature must not be in contact

with the joint for more than 5 seconds. The total contact time of successive solder waves must not exceed 5 seconds.

The device may be mounted up to the seating plane, but the temperature of the plastic body must not exceed the specified maximum storage temperature ( $T_{stg\ max}$ ). If the printed-circuit board has been pre-heated, forced cooling may be necessary immediately after soldering to keep the temperature within the permissible limit.

#### Repairing soldered joints

Apply a low voltage soldering iron (less than 24 V) to the lead(s) of the package, below the seating plane or not more than 2 mm above it. If the temperature of the soldering iron bit is less than 300 °C it may remain in contact for up to 10 seconds. If the bit temperature is between 300 and 400 °C, contact may be up to 5 seconds.

### DEFINITIONS

Data sheet status	
Objective specification	This data sheet contains target or goal specifications for product development.
Preliminary specification	This data sheet contains preliminary data; supplementary data may be published later.
Product specification	This data sheet contains final product specifications.
Limiting values	
Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.	
Application information	
Where application information is given, it is advisory and does not form part of the specification.	

### LIFE SUPPORT APPLICATIONS

These products are not designed for use in life support appliances, devices, or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips for any damages resulting from such improper use or sale.
