

Silicon Power Zener Diodes

Features

- Silicon Planar Power Zener Diodes
- For use in stabilizing and clipping circuits with high power rating.
- Standard Zener voltage tolerance suffix "A" for $\pm 5\%$ tolerance. Other Zener voltages and tolerances are available upon request.

949369

Applications

Voltage stabilization

Mechanical Data

Case: DO-41 Glass Case

Weight: approx. 350 mg

Packaging Codes/Options:

TR / 5k per 13 " reel , 25k/box

TAP / 5k per Ammo mag. (52 mm tape), 25k/box

Absolute Maximum Ratings

$T_{amb} = 25\text{ }^{\circ}\text{C}$, unless otherwise specified

Parameter	Test condition	Symbol	Value	Unit
Power dissipation	$T_{amb} \leq 50\text{ }^{\circ}\text{C}$	P_{Diss}	1	W
Z-current		I_Z	P_V/V_Z	mA
Junction temperature		T_J	200	$^{\circ}\text{C}$
Storage temperature range		T_{stg}	- 65 to + 200	$^{\circ}\text{C}$
Junction ambient	$l = 9.5\text{ mm (3/8 ")}$, $T_L = \text{constant}$	R_{thJA}	100	K/W

Electrical Characteristics

$T_{amb} = 25\text{ }^{\circ}\text{C}$, unless otherwise specified

Parameter	Test condition	Symbol	Min	Typ.	Max	Unit
Forward voltage	$I_F = 200\text{ mA}$	V_F			1.2	V

¹⁾ Based on dc-measurement at thermal equilibrium while maintaining the lead temperature (T_L) at $30\text{ °C} + 1\text{ °C}$, 9.5 mm (3/8 ") from the diode body.

²⁾ Valid provided that electrodes at a distance of 10 mm from case are kept at ambient temperature.

^{*)} Additional measurement of Voltage group 9V1 to 75 at 95 % $V_{zmin} \leq 35\text{ nA}$ at $T_j 25\text{ °C}$

Package Dimensions in mm

Ozone Depleting Substances Policy Statement

It is the policy of **Vishay Semiconductor GmbH** to

1. Meet all present and future national and international statutory requirements.
2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

Vishay Semiconductor GmbH has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

Vishay Semiconductor GmbH can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

**We reserve the right to make changes to improve technical design
and may do so without further notice.**

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay Semiconductors products for any unintended or unauthorized application, the buyer shall indemnify Vishay Semiconductors against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.
